

6516205113.txt

Sirs; I am an XM Radio subscriber and benefit greatly from having traffic and weather for a given area ready at the touch of a button. I use this information to route myself through or around the areas with coverage. They also give me information on highway blockages near these same areas and that in and of itself is wonderful. Due to the way the programing is set up I can listen to the desired station thus keeping more alert while driving as well as having the traffic information. I ask that you please reject soundly the NAB petition 04-160. Thank you for asking our comments. Mark Lowthorp 31 year truck driver and retired service member.
